

Ideas for wider reading

Strong applicants to Cambridge and other competitive universities tend to have explored their chosen subject through wider reading outside the classroom, as well as doing very well in their GCSEs and A-levels. We call this sort of exploration 'super-curricular', rather than 'extra-curricular', as it builds on and enhances what you are studying in school.

This selection of reading lists and resources has been gathered (fairly randomly!) from the Cambridge departmental and College websites, other universities and other sources on the internet. **These lists are certainly NOT 'required reading' for Cambridge applicants.** They simply provide some suggestions for places to start exploring your own interests in your chosen subject independently - you do not need to read any of the specific books mentioned.

It is important to read critically by thinking carefully about the arguments, assumptions and evidence being presented by the author. Reading quality news sources can be a useful way to encounter stories relevant to your academic interests and, more generally, to practise assessing arguments and weighing evidence. Some suggestions include:

- Broadsheet newspapers: The Guardian, The Times, Independent, Daily Telegraph
- BBC News online: www.bbc.co.uk/
- Al Jazeera English: www.aljazeera.com/
- The Economist: www.economist.com/
- CNN online: <http://edition.cnn.com/>
- The New Statesman magazine: www.newstatesman.com/

You do not need to buy any books – as well as using web resources, it is always worth visiting your local library as well as your school or college library. If you have a university near your home, you might be able to gain access to their library collections as well, which will include more specialist academic books and journals. Whichever library you visit, try speaking to librarians and asking them to suggest relevant reading and online resources on particular subjects, or to order in books which you would like to have a look at.

If you are looking for suggested reading which is specific to Cambridge, it is worth checking College websites for their reading lists for offer holders, as well as looking at the relevant faculty pages; for example, Kings College has particularly useful lists arranged by subject:

www.kings.cam.ac.uk/study/undergraduate/offerholders/reading-lists/index.html

Reading is a great way to explore subjects which you find interesting – but there are many other ways to deepen your understanding: investigate your local museums, monuments, galleries and natural features, and think analytically about nature, machinery or the built environment. Universities in your local area may run seminars, taster days or other Outreach activities which you

Disclaimer: This list of suggested resources for wider reading is designed as a set of informal suggestions and does not necessarily represent official policy of the University of Cambridge and its Colleges.

could attend. You might also like to join a regional or national club or society related to your academic interests, or enter competitions such as essay prizes or maths Olympiads.

It is also worthwhile to look on BBC iplayer for factual TV and radio programmes; “In Our Time” is a particularly useful introduction to hundreds of subjects: www.bbc.co.uk/radio4/features/in-our-time/archive/ Podcasts of academic lectures are increasingly available – start with iTunesU or search for podcasts on University websites.

The best thing about super-curricular activities is that there are no exams or deadlines to worry about – you are free to follow your own lines of enquiry into the areas that interest you the most. Rather than seeing this as a ‘tick box exercise’ to give you something to write about in your personal statement, you should take time to explore things that you genuinely find interesting and see where your investigations lead you.

These suggested sources of wider reading begin with some university reading lists for prospective students or undergraduates, and then include links to websites of organisations or publications which may provide further resources. They have been arranged alphabetically in categories according to the Cambridge undergraduate courses, but students applying to other university courses should be able to find relevant resources by looking at the lists for related subjects.
