

Product Design - Year 12 – Summer Vacation Task 2017

AQA Context Task

The following summer work is required by AQA as part of your controlled assessment.

You will need it for the first lesson in September.

Photographic Research Task

Using your camera over the break take 50 photographs that reflect outdoor leisure and living. Print them, add filters or enhance then mount them on card or in sketch book format. This is essential and will be classed personal research. Do not use images from the net. (Prints should be photographic size or Polaroid prints not just A4 Printed sheets)

30 Day sketch Challenge

Purchase a packet of post-it notes and sketch natural forms. (Pen and ink) On your taster day you would have been told about natural form. On the reserve side make a note of the object that was sketched, its location and date. You should have 30 sketches on 30 Post it notes. (Any sized post it notes)

Final Presentation

Select one of your natural forms and enhance it. You are expected to make an impact with this task. Maybe you will develop your sketch, produce a water colour, a collage, oil painting or use your computer skills to reproduce your natural formed artefact. (No size restrictions)
